Dear Dave,

This is a reminder that your Alteryx Designer Core Certification will expire on July 23, 2020.

Don't let that happen! You can keep your certification status up to date by passing the Alteryx Designer Core exam or the Alteryx Designer Advanced exam. If you let your certification expire, you'll need to repass the Core exam to be eligible to take the Advanced exam.

When you pass the Advanced exam you'll be eligible to take the Expert exam or earn one of our new Master Certifications! Check out the [Advanced Certification Prep Guide](#) to get a sneak peek and access learning resources that can help you take your Alteryx skills to the next level.

The Core and Advanced exams are now available on-demand, so head over whenever you're ready to [recertify](#). You can take the exam once every 7 days. Thank you for participating in the Alteryx Certification Program and happy learning!

Sincerely,

The Alteryx Certification Team
